Neutralize, Adsorb and Contain

FAST-ACT is a proprietary formulation of safe earth minerals capable of neutralizing, adsorbing, or containing a wide range of chemical threats. Available in pressurized cylinders, shaker bottles and bulk pails, FAST-ACT is an effective treatment for both liquid and vapor hazards, including:

- Acids
- Aldehydes
- Chlorinated Organics
- Oxidizers
- Phosphorous/Sulfur/Nitrogen Compounds
- Alcohols
- Caustics
- Ketones
- Petrochemicals
- Other Organics

Mitigates Known and Unknown Chemical Threats

FAST-ACT can be applied to virtually any chemical liquid or vapor release without losing valuable time to determine whether the target substance is an acid, base or organic. Unlike A-B-C Spill Kits, this removes any guess work and eliminates the possibility of making the situation worse or more dangerous by applying the wrong substance.

Applications

FAST-ACT can be safely applied in any location where known or unknown chemicals are a potential threat. Typical applications include:

- Hazmat Teams: Spill Response
- Environmental Health & Safety Officials
- First Responders: Fire, Police
- Laboratories: Schools, Universities, Hospitals, Commercial
- Industrial & Commercial Facilities: Accidents, Leaky Storage

SUMMARY

Simple

Easy to operate with minimal user training required

Fast

Neutralizes, adsorbs, and/or contains upon contact

Safe

Non-toxic, non-corrosive, non-flammable, environmentally friendly

Proven

Advanced patented technology with extensive testing with proven results

FAST-ACT shaker with optional wall mount

Product Delivery Systems

Pressurized Cylinder: 1 Kg, 2 Kg, 4 Kg

OPTIONS:

- Cylinder Wall Mount
- 4 Kg Wand

Pail: 5 Kg

Mitts: Cases of 80

Shaker: 500 g

OPTIONS:

- Shaker Wall Mount
- Vehicle Mounts
